

The City of Stroud is a Film Friendly Community.

The City of Stroud is a certified Film Friendly Community with the Oklahoma Film + Music Office, and Stroud City Hall is the designated liaison for all film productions in City Limits.

Stroud City Hall oversees permitting, manages a database of filming locations, and offers other planning and coordination services as needed to ensure the best possible experience for Films of all size and budgets when they choose Stroud for their Film Project.

The City of Stroud requires productions to secure a film permit. The process is straightforward, and Stroud City Hall is happy to guide production staff through its completion.

The permitting process covers all city services including, street closures, use of Public Locations, Municipal Locations, emergency services support and more.

Our Database includes local contact information for local services including Lodging, Dining, Shopping, and unique features to Stroud.

How your Business can get involved in the Film Business.

Every film project is different. Some have a small crew and cast, others number into the hundreds. Some film during regular business hours and others are at night, on weekends or both.

However, they all have similar needs and requirements and that is where you and your business can get involved.

By having your business listed with the Stroud Film Database, the city can inform film crews coming to Stroud that you are interested in providing either services, materials or even your location to their production.

The city will not make an agreement between you and the production company for services, location, or materials.

Those details are entirely up to you and what you feel capable and comfortable providing and charging.

We are merely making the film production aware that you exist and are possibly interested in working with them in some capacity.

Please be aware that you may not be able to fulfil their specific requirements and you are under no obligation to do so by being listed on the database.
